SPECTROCHIMICA ACTA

PART B: ATOMIC SPECTROSCOPY

LIST OF CONTENTS AND AUTHOR INDEX
VOLUME 42B, 1987

EDITOR-IN-CHIEF

Dr. P. W. J. M. Boumans, Philips Research Laboratories, 5600 JA Eindhoven, The Netherlands

EDITORS

Dr. Walter Slavin, Perkin—Elmer Corporation, Main Avenue, Norwalk, CT 06856, USA

Prof. Dr. H. Oechsner, University of Kaiserslautern, Bldg 46, P.O. Box 3049, 6750 Kaiserslautern, Federal Republic of Germany

ASSISTANT EDITORS

Prof. Dr. J. A. C. Broekaert, Institute of Spectrochemistry and Applied Spectroscopy (ISAS), P.O. Box 778, 4600 Dortmund, Federal Republic of Germany

Prof. Zhanxia Zhang, Chemistry Department, Sun Yatsen University, Guangzhou, P.R. of China

Publishing, Subscription and Advertising Offices: Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A.; Pergamon Journals Ltd., Headington Hill Hall, Oxford OX3 0BW, U.K. (Oxford 64881).

Payments must be made in advance. Subscription enquiries from customers in North America should be sent to: Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A., and for the remainder of the world to: Pergamon Journals Ltd., Headington Hill Hall, Oxford OX3 0BW, U.K.

One volume *per annum*. Published monthly. Annual Institutional subscription rates (1988) DM 1245.00. 2 year Institutional rate (1988/89) DM 2365.50. Personal subscription rate for those whose library subscribes at the regular rate (1988) DM 180.00. Prices include postage and insurance. Prices are subject to change without notice.

Microform Subscriptions and Back Issues

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

PART B: ATOMIC SPECTROSCOPY
CONTENTS OF VOLUME 42B, 1987
Nos 1/2
SPECIAL ISSUE
PLASMA SPECTROCHEMISTRY IV
Proceedings of the 1986 Winter Conference
on Plasma Spectrochemistry

R. M. Barnes	1	Introduction
A. R. Date, Yuk Ying Cheung and M. E. Stuart	3	The influence of polyatomic ion interferences in analysis by inductively coupled plasma source mass spectrometry (ICP-MS)
B. T. G. Ting and M. Janghorbani	21	Application of ICP-MS to accurate isotopic analysis for human metabolic studies
D. A. Wilson, G. H. Vickers, G. M. Hieftje and A. T. Zander	29	Analytical characteristics of an inductively coupled plasma-mass spectrometer
H. P. Longerich, B. J. Fryer and D. F. Strong	39	Determination of lead isotope ratios by inductively coupled plasma-mass spectrometry (ICP-MS)
G. Price Russ III and J. M. Bazan	49	Isotopic ratio measurement with an inductively coupled plasma source mass spectrometer
D. Hausler	63	Trace element analysis of organic solutions using inductively coupled plasma-mass spectrometry
H. P. Longerich, B. J. Fryer D. F. Strong and C. J. Kantipuly	75	Effects of operating conditions on the determination of the rare earth elements by inductively coupled plasma-mass spectrometry (ICP-MS)
Shiuh-Jen Jiang and R. S. Houk	93	Elemental and isotopic analysis of powders by inductively coupled plasma-mass spectrometry with arc nebulization
H. P. Longerich, B. J. Fryer and D. F. Strong	101	Trace analysis of natural alloys by inductively coupled plasma-mass spectrometry (ICP-MS): application to archeological native silver artifacts
A. Gustavsson	111	Characterization of an interface for sample introduction into an inductively coupled plasma
T. Nakahara, K. Nakanishi and T. Wasa	119	Determination of trace concentrations of bismuth by inductively coupled plasma-atomic emission spectrometry with hydride generation
Benli Huang, Zhuoyong Zhang and Xianjin Zeng	129	A new nebulizer-hydride generator system for simultaneous multielement inductively coupled plasma-atomic emission spectrometry

Xiaoru Wang and R. M. Barnes	139	A mathematical model for continuous hydride generation with inductively coupled plasma spectrometry—II. pH dependence of hydride forming elements
G. D. Christian and J. Ruzicka	157	Flow injection analysis: a novel tool for plasma spectroscopy
M. P. Granchi, J. A. Biggerstaff, L. J. Hilliard and P. Grey	169	Use of a robot and flow injection for automated sample preparation and analysis of used oils by ICP emission spectrometry
R. I. Botto	181	Matrix interferences in the analysis of organic solutions by inductively coupled plasma-atomic emission spectrometry
G. A. Meyer	201	Determination of metals in xylene by inductively coupled air plasma emission spectrometry
L. Halicz and I. B. Brenner	207	Nebulization of slurries and suspensions of geological materials for inductively coupled plasma-atomic emission spectrometry
I. B. Brenner, A. Lorber and Z. Goldbart	219	Trace element analysis of geological materials by direct solids insertion of a graphite cup into an inductively coupled plasma
A. Miyazaki and K. Bansho	227	Differential determination of trace amounts of iodide and iodate in water by solvent extraction-inductively coupled plasma atomic emission spectrometry
H. Haraguchi and A. Takatsu	235	Derivative gas chromatography of methylarsenic compounds with atmospheric pressure helium microwave induced plasma-atomic emission spectrometric detection
H. J. Perpall, P. C. Uden and R. L. Deming	243	Empirical and molecular formula determination of polymer pyrolyzates by multi-referencing GC-MIP spectroscopy
D. F. Hagen, L. C. Haddad and J. S. Marhevka	253	Solution and gas phase deuterium derivatization reactions for gas chromatography/microwave emission detection
K. J. Irgolic and J. E. Hobill	269	Simultaneous inductively coupled argon plasma atomic emission spectrometer as a sulfur-specific detector for the HPLC analysis of sulfur-containing surfactants
E. A. Huff	275	Characterization of selected nuclear fuel cycle materials by column extraction chromatography and ICP-AES
M. Selby and G. M. Hieftje	285	Taming the surfatron

D. L. Haas and J. D. Jamerson	299	Preliminary studies in the determination of the alkali metals by microwave induced plasma (MIP) spectrometry
S. R. Goode and L. K. Kimbrough	309	An experimental study of the signal-to-noise ratio in the microwave-induced plasma gas chromatographic detector
S. B. Smith, Jr, M. A. Sainz and R. G. Schleicher	323	Optiplex: a multidimensional response surface fitting procedure for optimization of instrumental parameters
G. A. Meyer	333	Conical three-electrode d.c. plasma for spectrochemical analysis
G. M. Levy, A. Quaglia, R. E. Lazure and S. W. McGeorge	341	A photodiode array based spectrometer system for inductively coupled plasma-atomic emission spectrometry
B. L. Caughlin and M. W. Blades	353	Effect of wet and dry nebulizer gas on the spatial distribution of electron density
A. F. Parisi, G. D. Rayson G. M. Hieftje and J. W. Olesik	361	Temporally and spatially resolved studies in an amplitude modulated inductively coupled plasma
J. W. Olesik and K. R. Bradley	377	Analyte excitation in the inductively coupled plasma studied by power modulation
P. B. Farnsworth, D. A. Rodham and D. W. Ririe	393	The use of time- and space-resolved emission data for fundamental studies of a pulsed ICP
X. Claudon, J. C. Birolleau, M. Lavergne, B. Miche and C. Bergey	407	Simultaneous determination of americium and plutonium by inductively coupled plasma-atomic emission spectrometry
A. A. Wittmann and L. G. Schuster	413	Indirect determination of phosphorus in steel by inductively coupled plasma-atomic emission spectrometry
		Analytical Note
A. A. Wittmann and F. R. Kop	417	Fusion-dissolution of oxides by Plasmasol followed by enrichment for trace analysis by inductively coupled plasma-atomic emission spectrometry
		Announcement
